

Wenzhou Jianda Medical Instrument Co., Ltd.

is a Chinese manufacturer and supplier of aneroid sphygmomanometer, stethoscopes and accessories.

JIANDA medical instruments are produced as per international standards and have been exported to USA, EEC and many other countries. We produce more than 500,000 sets of sphygmomanometers and stethoscopes every year.

With the superior quality of our products, in May of 1998, our products passed the audit of CE of European Economy Committee. Now we have gotten new CE certificate under MDR system.

“JIANDA” Brand sphygmomanometers and stethoscopes become more and more famous and popular among the customers all around the world. Many famous distributors and manufacturers have been choosing JIANDA as their producer or goods resources.

JIANDA welcomes more customers come to our factory to investigate and discuss business.

infusion sphygmomanometer

Introduction of infusion sphygmomanometer

Function of infusion sphygmomanometer (infusion pressurization bag with sphygmomanometer)

The full name of infusion sphygmomanometer is infusion pressurization bag with sphygmomanometer. Infusion sphygmomanometer is used as a medical product in emergency case. It is used to speed up the infusion speed with pressure method for the emergency patients who need infusion of medicine liquid or plasma with increased amount at higher speed. For example, in the course of the intervention, because the vagus nerve reflex of some patients, dizziness, nausea, sweating, heart rate slowing down, blood pressure dropping to a extremely low level are likely to happen. If there is not a timely rescue, patients will fall into danger. Infusion sphygmomanometer is used as an effective instrument to save lives and reduce the labor intensity of doctors and nurses.

Main Technical data of infusion sphygmomanometer

1. 0-400mmHg gauge
2. The gauge is integrated with air bulb
3. Air tightness of infusion bag: The infusion bag shall have good air tightness and there shall be no leakage in the usage of 3 hours.
4. The hanging ring shall stand weight of 1kg.

Advantages of Jianda infusion sphymomanometer

1. 0-400mmHg gauge can help read and control the pressure in a larger scope than normal 0-300mmHG gauge.
2. Air bulb is connected with gauge and so users can press the bulb with one hand and check the pressure shown in the gauge. Another hand of the user is free for others, which is important especially in

emergent cases.

Usage of infusion sphygmomanometer

1. Put the plasma bag or infusion bag inside the infusion pressurization bag. Put the hanging rope of plasma bag or infusion bag through the hanging ring of infusion pressurization bag and fix it. Hang it on the transfusion shelf.
2. Inflate the infusion pressurization bag with bulb.
3. The speed and amount of infusion can be adjusted by the pressure of infusion pressurization bag. The pressure indicated on the dial of the gauge help users adjust pressure correctly. When the pressure is proper, fix the air release valve by rotating the air release valve clockwise.
4. When the infusion is finished, release the air inside the air bladder by rotating the air release valve anticlockwise.
5. Repeat the above for another time's infusion.

Special suggestion about infusion pressurization bag:

This product is only used for one patient so as to avoid cross infection.

Storage of infusion pressurization bag:

Infusion pressurization bags with sphygmomanometers shall be stored in a well ventilated room with relative humidity not more than 85% and there shall be no corrosive gas in the room.

JD-1001

JD-1001 standard aneroid sphygmomanometer

- *zinc alloy or aluminum alloy gauge
- *gauge color: gray, blue, black, purple red, violet, green
- *0-300mmHg or 20-300mmHg
- *gauge diameter:52mm
- *with or without stop pin
- *cotton or nylon cuff, without metal ring
- *cuff size:50* 14cm
- *latex/PVC bladder
- *bladder size:22*12cm
- *latex/PVC bulb
- *air-release valve with spring; standard end valve
- *packing:1pc/artificial leather bag or nylon bag, 50pcs/carton
- *carton size: 56*34*32cm, gross weight:21kgs

JD-1002

JD-1002 standard aneroid sphygmomanometer

*zinc alloy or aluminum alloy gauge

*gauge color: gray, blue, black, purple red, violet, green

*0-300mmHg or 20-300mmHg

*gauge diameter:52mm

*with or without stop pin

*cotton or nylon cuff, with metal ring

cuff size:50.8 14cm

*latex/PVC bladder

*bladder size:22*12cm

*latex/PVC bulb

*air-release valve with spring; standard end valve

*packing:1pc/artificial leather bag or nylon bag, 50pcs/carton

*carton size: 56*34*32cm, gross weight:23kgs

JD-1003

JD-1003 child aneroid sphygmomanometer

*zinc alloy or aluminum alloy gauge

*gauge color: gray, blue, black, purple red, violet, green

*0-200mmHg or 20-200mmHg

*gauge diameter: 52mm

*with or without stop pin

*cotton or nylon cuff, without metal ring

*cuff size: 34.5*11cm /25*5cm/28*8cm

*latex/PVC bladder

*bladder size: 17*8.5 cm /10*2.5cm/11*6cm

*latex/PVC bulb

*air-release valve with spring; standard end valve

*packing:1pc/artificial leather bag or nylon bag, 50pcs/carton

* carton size: 56*34*32cm, gross weight:17kgs

JD-1004

JD-1004 standard aneroid sphygmomanometer with stethoscope

Descriptions of aneroid sphygmomanometer:

- *zinc alloy or aluminum alloy gauge
- *gauge color: gray, blue, black, purple red, violet, green
- *0-300mmHg or 20-300mmHg
- *gauge diameter:52mm
- *with or without stop pin
- *cotton or nylon cuff, with metal ring
- *cuff size:50.8* 14cm
- *latex/PVC bladder
- *bladder size:22*12cm
- *latex/PVC bulb
- *air-release valve with spring; standard end valve

Descriptions of stethoscope:

- *Aluminum alloy or zinc alloy chest piece
- *Brass or aluminum alloy binaural with chromium plating
- *Chest piece fixed or not fixed on the cuff
- *packing:1pc/artificial leather bag or nylon bag, 50pcs/carton
- carton size: 52*41*36.5cm, gross weight:29kgs
- *another packing:24 pcs/carton, carton size: 40.5*31.5*29.5cm, gross weight:13.5kgs

Alternatives:

JD-1009

JD-1009 desk & wall type double function aneroid sphygmomanometer

*Gauge color:black, or other colors specified by customers

*Square gauge, size 155x155mm

*front and rear adjustable for easy reading

*0-300 mmHg or 20-300mmHg

*50.8 *14cm cotton or nylon cuff with metal ring

*22*12 cm adult dual tube latex /PVC bladder

*latex /PVC bulb;

*air-release valve with spring; standard end valve

*Coil tube 1.5m long

*packing:1pc/box, 20pcs/carton, carton size: 85*39*37cm, gross weight:22kgs

JD-1010

JD-1010 desk & wall type double function aneroid sphygmomanometer with single head stethoscope

Descriptions of aneroid sphygmomanometer

- *Gauge color:black, or other colors specified by customers

- *Square gauge, size 155x155mm

- *front and rear adjustable for easy reading

- *0-300 mmHg or 20-300mmHg

- *50.8 *14cm cotton or nylon cuff with metal ring

- *22*12 cm adult dual tube latex /PVC bladder

- *latex /PVC bulb;

- *air-release valve with spring; standard end valve

- *Coil tube 1.5m long

Descriptions of stethoscope:

- *Aluminum alloy or zinc alloy chest piece

- *Brass or aluminum alloy binaural with chromium plating

- *Chest piece fixed or not fixed on the cuff

*packing:1set/box, 20sets/carton, carton size: 85*39*37cm, gross weight:24.5kgs

Alternatives:

With JD-3002 dual head stethoscope/JD-3004 rappaport stethoscope/JD-3006 stainless stethoscope

JD-1011

JD-1011 desk type aneroid sphygmomanometer

*Round gauge with 172mm diameter

*Gauge color: blue, or other colors specified by customers

*front and rear not adjustable

*0-300 mmHg or 20-300mmHg

*50.8 *14cm cotton or nylon cuff with metal ring

*22*12 cm adult dual tube latex /PVC bladder

*latex /PVC bulb;

*air-release valve with spring; standard end valve

*Coil tube 1.5m long

*Packing: 1pc/box, 12 pc/carton, carton size:72*68*37mm

*Gross weight: 18kgs

JD-1011T

JD-1011T desk type aneroid sphygmomanometer(gauge adjustable)

*Round gauge with 172mm diameter

*Gauge can be adjusted 160 degree from the front to the back,360 degree from left to right

*Metal basket to put the cuff and bulb;

*Gauge color:blue, or according to customers specified colors

*0-300 mmHg or 20-300mmHg

*50.8 *14cm cotton or nylon cuff with metal ring

*22*12 cm adult dual tube latex /PVC bladder

*latex /PVC bulb;

*air-release valve with spring; standard end valve

*Coil tube 1.5m long

*Packing: 1pc/box, 12 pc/carton, carton size:78*71*37mm

*Gross weight: 19kgs

JD-1012

JD-1012 stand type aneroid sphygmomanometer

*Gauge color:black, or other colors specified by customers

*Square gauge, size 155x155mm

*front and rear adjustable for easy reading

*0-300 mmHg or 20-300mmHg

*Aluminum alloy stand tube, height adjustable from 97 to 126cm

*50.8 *14cm cotton or nylon cuff with metal ring

*22*12 cm adult dual tube latex /PVC bladder

*latex /PVC bulb;

*air-release valve with spring; standard end valve

*Coil tube 1.5m long

JD-1012T

JD-1012T stand type aneroid sphygmomanometer

- *Round gauge with 172mm diameter

- *Gauge color:blue, or according to customers specified colors

- *Gauge can be adjusted 160 degree from the front to the back,360 degree from left to right

- *metal basket to put the cuff and bulb

- *0-300 mmHg or 20-300mmHg

- *Aluminum alloy stand tube, height adjustable from 97 to 126cm

- *50.8 *14cm cotton or nylon cuff with metal ring

- *22*12 cm adult dual tube latex /PVC bladder

- *latex /PVC bulb;

- *air-release valve with spring; standard end valve

- *Coil tube 1.5m long

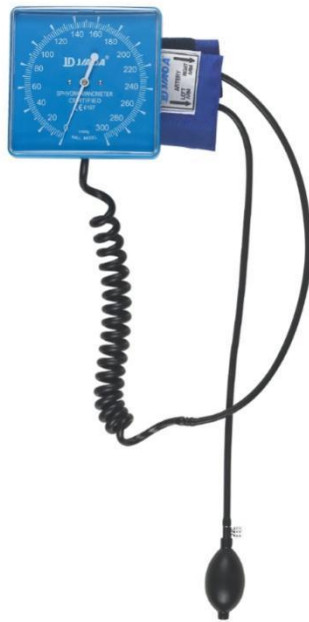

- *aluminum alloy stand,height adjustable

- *PVC material base, 5 castors with brake

- *Packing: 1pc/carton, carton size:74*48*19cm

- *Gross weight: 8.5kgs

JD-1013

JD-1013 wall type aneroid sphygmomanometer

- *Square gauge, size 155mmx155mm
- *20-300mmHg or 0-300mmHg
- *Gauge color :blue or according to specified colors of customers
- *Gauge can be adjusted 60 degree left & right for easy reading
- *50.8 *14cm cotton or nylon cuff with metal ring
- *22*12 cm adult dual tube latex /PVC bladder
- *latex /PVC bulb;
- *air-release valve with spring; standard end valve
- *Coil tube 1.5m long
- *Packing: 1pc/box, 20 boxes/carton, carton size:89*37*28cm
- *Gross weight: 22kgs

JD-1014

JD-1014 new type standard aneroid sphygmomanometer

*Zinc alloy gauge with plastic cover in the front

The gauge size:

Height: 76mm

Width: 57mm

*Color of plastic cover: milky white or blue

*20-300mmHg or 0-300mmHg

*50.8 *14cm cotton or nylon cuff with metal ring

*22*12 cm adult dual tube latex /PVC bladder

*latex /PVC bulb;

*air-release valve with spring; standard end valve

*packing: 1pc/artificial leather bag or nylon bag, 50pcs/carton

carton size: 56 x34x32cm, gross weight:23kgs

JD-1015S

JD-1015S single tube palm type aneroid sphygmomanometer

- *ABS gauge; gauge diameter 68mm;
- *0-300 mmHg or 20-300mmHg
- *Gauge color:red ,blue ,or according to customers specified colors
- *53*14.5cm nylon cuff without metal ring
- *22*12 cm adult single tube latex /PVC bladder
- *latex /PVC bulb;
- *air-release valve with spring; standard end valve
- *nylon bag size: 22*12*4.5cm
- *packing:1pc/big size nylon carrying bag, 24pcs/carton
- *carton size: 47.5*29.5*38cm, gross weight:11.5kgs
